GEOMETRIE IN MOVIMENTO SMOOTH GEOMETRIES

Geometrie in movimento per personalizzare la tua cucina. CREATIVA® è un programma di arredo per chi desidera uno spazio abitativo unico ed esclusivo. Giochi di colori, di materiali e di forme combinabili tra loro per una creatività senza fine.

Il sottile gioco di ombre generate dal doppio spessore, rivoluziona la tradizionale planarità delle ante, esaltando la dinamicità di ogni composizione. Libertà creativa per tutte le tue esigenze di spazio.

Smooth geometries to personalize your kitchen.

CREATIVA® is a furnishing program for those who desire to have a unique and exclusive living space.

A fine movement of shadows generated from double thickness of the door, revolutionizes the flatness of traditional doors, enhancing the dynamism of each composition. Free creativity for all your living space needs.

CARATTERISTICHE TECNICHE

ESTREMAMENTE FACILE DA UTILIZZARE

EXTREMELY EASY TO USE

CREATIVA®

Grazie a SERVO-DRIVE basta una leggera pressione sul fronte con la mano o il gomito per aprire automaticamente le ante a ribalta.

Persino i frontali grandi e pesanti si aprono verso l'alto come in totale assenza di gravità.

Inoltre, l'utilizzatore della cucina può godere di un accesso ottimale all'interno del mobile.

Thanks to SERVO-DRIVE, just apply light pressure to the front panel with the hand or elbow to automatically open the folding doors.

Even large front panels open upwards with a complete lack of gravity. In addition, the opening provides optimum access to the cabinet interior.

Chiusura comoda e semplice, assicurata dall'interruttore facilmente raggiungibile, montato sul fianco del corpo mobile.

Le chiusure delle ante a ribalta risulta così estremamente comoda ed ergonomica, mentre la rinomata funzione BLUMOTION garantisce una chiusura dolce e silenziosa.

Simple and convenient to close using an easy-to-reach switch fitted on the side of the cabinet.

Closing the folding doors is so easy, convenient and ergonomic. The renowned BLUMOTION function also ensures gentle and silent closing.

APERTURA VERTICALE OBLIQUA

I pensili con questo tipo di meccanismo necessitano per l'apertura di poco spazio libero sopra il mobile grazie al movimento basculante dell'anta che si apre senza difficoltà applicando poca forza anche in presenza di frontali pesanti. Con l'arresto progressivo le ante si fermano in qualsiasi posizione; in questo modo la maniglia è sempre facilmente raggiungibile. La chiusura è ammortizzata ed è possibile regolare la forza di tenuta in base al peso del frontale.

VERTICAL OPENING OBLIQUE

Wall units that mount this type of mechanism require little clearance above the cabinet thanks to the swivelling movement of the door that can be easily opened by applying slight pressure, even with heavy fronts. The doors stop in any position thanks to the gradual stopping movement; in this way, the handle is always easily accessible. The closing movement is cushioned and the closing force can be adjusted according to the weight of the front door.

SCHEMA MONTAGGIO LIMITATORE LIMITER INSTALLATION DIAGRAM

MOTORIZZATO SERVO-DRIVE SERVO-DRIVE MOTORISED

Per evitare l'interferenza dell'anta in fase di apertura con cornici o mensole, si può richiedere il limitatore dell'angolo di apertura cod. 5620005

In order to avoid that the door interferes with cornices or shelves during the opening movement, it is possible to request an opening angle limiter: code 5620005

PENSILE CON APERTURA A RIBALTA

Le ante aprendosi verso l'alto consentono di avere un' ampia visione d'insieme all'interno del mobile. In questo modo è possibile un comodo accesso agli oggetti contenuti al suo interno e, dal punto di vista ergonomico, molto vantaggioso. La regolazione della forza di apertura può essere impostata in modo esatto in base al peso del frontale. Grazie all'arresto progressivo le ante si fermano in qualsiasi posizione; in questo modo la maniglia è sempre facilmente raggiungibile. La chiusura è ammortizzata e un'unica manovra è sufficiente per regolare il frontale tridimensionalmente grazie all'assenza di cerniere e al sistema di aggancio clip.

WALL UNIT WITH FLAP DOOR

The doors that open upwards guarantee ample overall visibility inside the cabinet. In this way, all objects housed inside the cabinet can be comfortably accessed, making the system highly advantageous from an ergonomic perspective. The opening force can be adjusted precisely depending on the weight of the front. The doors stop in any position thanks to the gradual stopping movement; in this way, the handle is always easily accessible. The closing movement is cushioned and a single manoeuvre is required to three-dimensionally adjust the front, thanks to the clip-on system and the absence of hinges.

INFORMAZIONI TECNICHE TIRAMIGIÙ

TECHNICAL INFORMATION TIRAMIGIÙ

Tiramigiù è un meccanismo a traslazione verticale servoassistita da motore elettrico.

Il tiramigiù esprime una funzionalità inedita che accorcia ulteriormente le distanze dall'uomo: infatti, grazie ad un particolare sistema meccanico - elettrico che si attiva con la completa apertura dell'anta, scende all'altezza della persona per porgere gli oggetti contenuti al suo interno, permettendo al contempo un'ulteriore ottimizzazione degli spazi con lo sfruttamento di altezze prima non fruibili e una drastica riduzione di azioni e movimenti correlati. Disponibile anche nella versione elettronica con telecomando.

N.B. : lo schienale tra basi e pensili non deve superare 2 cm di spessore.

Utilizzare il rubinetto sotto finestra

Tiramigiù is a servo-aided vertical sliding mechanism powered by a remote controlled electric motor.

Tiramigiù expresses innovative functionality that eliminates the barriers with man: thanks to a special mechanical-electronic system equipped with remote controlled switch, the device lowers down to the user's height to facilitate access to the objects inside it; at the same time, space can be further optimised by exploiting previously unused upper spaces while drastically reducing the required manoeuvres and movements. Electronic version with remote control is also available.

Note: the back panel between base and wall units, should not exceed 2 cm thickness.

Use the under-window tap

Con **CREATIVA®**, in **fase di progettazione** l'immagine complessiva della stessa composizione può essere personalizzata secondo il proprio gusto estetico seguendo semplici regole che rendono unica la tua cucina.

Come è composta l'anta

Tecnicamente le ante di **basi, cassetti, cestoni e colonne** sono realizzate assemblando un pannello sp.16 mm con un altro dello stesso spessore che diventa la maniglia stessa dell'anta. Per un totale quindi di 32 mm. Per questo motivo rispetto ad un tradizionale modello LUBE moderno, tutte le ante di **CREATIVA®** (fatta eccezione per le ante dei pensili), risultano più strette in larghezza di 2 mm.

E' stata studiata inoltre un' apposita cerniera con ammortizzatore integrato e basetta per alto spessore che si contraddistingue dalle altre per un piccolo segmento a rilievo posto sopra il corpo della cerniera stessa.

Tutti i moduli di **CREATIVA®** montano di serie questa nuova cerniera, ad eccezione dell'anta frigo, dei mobili ad angolo e delle ante dei pensili. L'anta **pensile** infatti, è semplicemente un pannello sp.16 mm esclusivamente con presa maniglia sul fondo.

Regole per una corretta progettazione

• Ante basi e colonne con cerniere

Ogni anta è stata studiata per garantire sempre un'apertura ergonomica. Ne esistono perciò diversi tipi pensati in funzione della tipologia del mobile e delle sue dimensioni.

Per quanto riguarda le basi la scelta di alcuni tipi di anta è vincolata, mentre per altri il Cliente può decidere secondo il proprio gusto estetico.

Il “disegno” di queste tipologie ha poi il verso DX-SX obbligato come è chiaramente illustrato nelle schede tecniche seguenti.

Le ante colonna invece, sono contraddistinte da un solo tipo necessario per consentire la corretta apertura.

• Ante cassette e cestoni

A differenza delle ante di basi e colonne, in **fase di progettazione** il singolo cassetto o cestone può assumere due differenti “versi” con una rotazione di 180°. In questo caso non esistono quindi tipologie di ante, ma si parla semplicemente di rotazione dell'anta stessa.

La scelta del “verso” diventa perciò un motivo puramente estetico che il Cliente può decidere senza alcun vincolo legato alle aperture.

With **CREATIVA®**, during the **design phase** the overall view of the same composition can be customised to suit personal tastes by observing a few basic rules that make your kitchen unique.

Composition of the doors

Technically speaking, the doors of **base units, drawers and deep drawers** are manufactured by assembling a 16 mm thick panel together with another panel of the same thickness which becomes the door handle. The final thickness is thus 32 mm.

As a result, compared to a traditional modern LUBE model, all the **CREATIVA®** doors (except for wall units doors) are smaller in width by 2 mm. Moreover, a special hinge was designed with incorporated shock-absorber and high-thickness base plate that, compared to other hinges, includes a small relief segment above the hinge body.

All **CREATIVA®** modules are equipped with this new hinge as a standard feature, except for the doors mounted on fridges, corner cabinets and wall units. The door **wall unit** basically consists of a 16 mm thick panel exclusively with the handle grip on the bottom.

Rules for correct design

• **Base unit and column doors with hinges**

Each door is designed to guarantee ergonomic opening.

As a result, several different types are available depending on the type of the cabinet and the latter's size.

With regard to base units, the choice of certain door types is binding, while for others, the Customer may select according to personal taste.

The “design” of these door types has a mandatory RH-LH direction, as clearly illustrated in the following technical sheets.

On the other hand, the column doors are distinguished by a single type necessary to ensure their correct opening.

• **Drawer and deep drawer doors**

Unlike base unit and column doors, during the design phase the single drawer or deep drawer can open in two different “directions” with 180° rotation.

In this case, therefore, the type of door is irrelevant: we speak about the door rotation instead.

The Customer thus selects the door “direction” based on aesthetic considerations alone, without any constraints as to the door opening.
